

## Newsletter 2/2015

### New product in Airway Medix's portfolio – ETT Cuff Pressure Regulator

Airway Medix is developing a new product - ETT Cuff Pressure Regulator. The inventors use the experience gained while working on the ETT (Endotracheal tube). The feedback from the market also confirms the interest in such solution. The ETT Cuff Pressure Regulator controls the pressure in the endotracheal tube cuff. It has global IP protection. It is dedicated for Intensive Care Units as well as for the Surgical Units (each surgical procedure exceeding 30 minutes requires such solution). Only in the United States there are approximately 13 mln procedures like that a year, so the market is significant.

The ETT cuff prototype is almost ready. The first version of the this product has already been presented to the strategic distributors of medical appliances, and the next, more developed version is currently presented to the focus groups (nurses) in the United States and Israel, where are highly scored.

The Airway Medix Board estimates, that the registration of this product will be possible in the EU until the end of this year, because it's not invasive and has favorable security profile. The documentation required to receive the CE certificate, that allows the sale in the EU, will be submitted in July, 2015.

### Airway Medix with CSS at IATI-Biomed 2015 Conference in Israel

In May 12-14, 2015 Airway Medix presented Closed Suction System (CSS) at the 14th National Life Science and Technology Week IATI-Biomed Conference in Israel. It is the next presentation of the Airway Medix solution at the medical international conference. Previously the CSS was presented at the 6th EfCCNa (European Federation of Critical Care Nursing Associations) Conference in Valencia, Spain, where Kaplan Medical Center showed the preliminary CSS research results. We wrote about it in February.

The IATI – Biomed Conference is one of the biggest international sectorial events, with many prestigious and well-known companies and scientists presenting current findings and innovations in medicine, biomedicine and pharmacology.

The Airway Medix portfolio products were well received by the congress participants.

More details about the conference is available at the conference official website:
